

Frequently Asked Questions

1) What is a trauma frequency?

An emotion can become stuck in the body because it was not processed correctly. Unprocessed emotions that become stuck in the body are called Trauma Frequencies.

2) How is an emotion not processed correctly and how can they become stuck on the body?

- An emotion is processed correctly when a negative emotion is experienced but then ignored, suppressed, or not acknowledged. It then has the potential to become stuck in the body as a negative vibrational frequency.
- Or...if you are exposed to the same negative emotion on a frequent basis, or over a prolonged period of time, it can also become stuck in the body.
- Every emotion vibrates at its own unique frequency. When an emotion becomes stuck in the body, it becomes stuck in a specific area of the body or body system. This causes an energetic imbalance in that specific body part or body system causing it to vibrate at its own unique frequency.
- Pains, aches and negative symptoms can be caused by these trauma frequencies that become stuck in the body.
- It is important to note that only negative emotions become stuck in the body. Negative emotions are usually caused by mild or severe trauma, hence the name Trauma Frequency.

3) Different types of trauma frequencies:

- **Your Own Trauma Frequency:** linked to your own personal traumatic events or feelings that were not processed correctly.
- **Bloodline Trauma Frequency:** A Trauma Frequency that was inherited. It gets downloaded as an energetic frequency at the moment of conception.
- **Absorbed Trauma Frequency:** This is an emotion, feeling or trauma that is absorbed from another person. Through abuse some emotions might be absorbed, or intense emotions experienced through trauma from someone close to you can be absorbed.
- **Prenatal Trauma Frequency:** It can be the baby's own emotion that becomes stuck due to rejection or trauma during the time in the womb. Alternatively it can be absorbed from mom, or dad or even a twin during the time in the womb.
- **Resonance:** A very intense trauma, emotion or feeling that resonates throughout the entire body at a specific frequency.
- **Barrier Trauma Frequency:** This is a Trauma Frequency that the subconscious mind created to form a barrier of protection around a person's heart and feelings. The subconscious builds a barrier or a fortification in order to protect a person against a potential threat, or protecting the heart from more hurt, harm or betrayal. This hampers a person's ability to give and receive love and it will negatively impact their relationship and intimacy with God.
- **Psychological Trauma:** This kind of trauma is linked to a traumatic or emotional shock. The trauma or shock is experienced so intensely, that it causes the body to experience two or three emotions simultaneously. These emotions are then merged and become trapped as a unique psychological trauma frequency.

4) What does a Bloodline Quantum Session entail?

Through Proxy Muscle Testing or Manual Muscle Testing we are able to utilize Muscle Testing to identify dark epigenetic markers on our DNA, memory banks and bloodlines. Our cells, bones, blood, seed, cores, DNA and RNA contain the cellular memories of our progenitors. We can identify the following epigenetic markers on your DNA:

- Bloodline Curses and prayers of renunciation to pray
- Entities (Fallen angels and demons)

- **Demonic gatekeepers**
- **Iniquity or unrepented sin giving the enemy legality**
- **Connections to grids and constellations and more**
